Use this layout plan to play with colours for your background fabrics.

As you probably guessed from the name, the blocks will feature stars and trees. I can't tell you much more, as it's a mystery!

But I'm going to make two versions: one has a solid dark grey background with colourful scraps for the stars and trees

I'm using shades of greens and teals for the trees, and pinks, yellows and oranges for the stars.

The other is more traditional reds and greens, because stars and trees lend themselves to a quilt with a Christmassy feel. Ill be mixing up the background fabrics for this version. Just so it's not too predictable, some pink and turquoise might sneak in there too!
